Abstract of JP2003052746

PROBLEM TO BE SOLVED: To provide an absorptive article which is capable of manifesting a deodorant effect and an antimicrobial effect with good balance, maintaining the state of the skin and preventing the degradation in absorption performance.

SOLUTION: The absorptive article 1 is constituted by disposing a layer 8 mainly having the deodorant effect and a layer 9 mainly having the antimicrobial effect between a top sheet 2 and an absorber 4. A layer containing a chelating agent or antioxidant is disposed between the top sheet 2 and the layer 9 mainly having the antimicrobial effect. The layer 8 mainly having the deodorant effect contains a deodorant consisting of a porous powder and granular material and the layer 9 mainly having the antimicrobial effect contains an antimicrobial agent containing silver, copper or zinc.
